Europe / CIS / Russia

North & South America

Consep enjoys a Golden night at the Export Awards

Consep was awarded the 2015 Premier's NSW Export Awards for the Category of Minerals, Energy and Related Services presented by the Export Council of Australia. The Award recognizes NSW companies and their contribution to the state and national economy.

Consep is an Australian company that engineers, manufactures and supplies innovative market leading capital equipment to the global mining and construction industries.

We have our own offices in Sydney and Perth, and employ a range of specialist staff in these offices to support different areas of the world. We also have a world wide agents network to ensure that our customers have strong local support.

In an era in which Australian manufacturing has diminished, Consep has remained committed to local engineering and manufacture, with a large purpose built engineering and manufacturing facility in Sydney. Despite the current difficulties being experienced by the global mining industry Consep has sustained success and growth. This is due to our continuous commitment to the development of our staff, our dogged pursuit of the highest quality in-house engineering and manufacturing all combined with a tenacious can do attitude.

After 25 years of growth, Consep enjoyed a record year in international sales last year and we thought it was time to tell our story to a wider audience with a view that recognition from the Export Council of Australia. In 2015 Consep exported equipment to twenty seven different countries across every continent and every state in Australia, with our service and support staff travelling extensively.

Consep's application to the Export Council Awards included a twitter campaign to highlight the level of export business being achieved, but importantly the customers, world wide travel and staff that make this possible. Several of the photographs are included in this newsletter.

Consep proceeded to the 2015, 53rd National Export Awards as National Finalists. A great night was had by the Consep team, and we congratulate Blast Movement Technologies from Brisbane for their success on the night.

The Export Awards applications process was a great and highly recommended event for all companies. Although the awards nights themselves were great to be involved in, it was the process of learning about our own strengths, and about other companies export strategies and their successes that are the lasting result.
